

The X International Conference “**Mechanisms of Catalytic Reactions**” (MCR-X) will be held in Svetlogorsk (Kaliningrad region, Russia) on 2-6 October, 2016. Traditionally, about 250 scientists from more than 30 countries take part in the forum. International Conference “Mechanisms of Catalytic Reactions” focuses on recent insights into the mechanisms of chemical reactions occurring in the presence of catalysts, ranging from homogeneous molecular catalysts (inorganic, organic, metal complex based) to heterogeneous catalysts.

The Organizing Committee cordially invites industrial companies, enterprises and their regional representatives, and distributors to take part in the Conference and support the event as a CONFERENCE PARTNER.

PRESENTATION OF PARTNERS

During the Conference an Exhibition will be organized where companies could present their advertising materials, compact installations and equipment for control of chemical and phase composition, spectral analysis and testing of catalysts, as well as high-tech equipment for the analysis of the mechanisms of catalytic reactions at the atomic and molecular level. The analytical equipment for *in situ*-measurements, including those coupled with catalytic units, equipment for the control of the catalyst states under the course of catalytic reaction, as well as those allowing the analysis (including isotopic) of the reaction products with high time resolution will be of major interest. The partners company will be provided with tables, chairs and power supply for laptops, as well as space for their banners and stands.
